WORK OF DESTRUCTION.

Foreign Consulates Are Being Protected --Japanese Premier Appeals For United National Support.

TOKIO, Sept. 13, (6 p. m.)—Troops of infantry are now guarding the foreign consulates, churches, convents and hotels and cavalry are patrolling the streets. One hundred and nineteen arrests had been made up to noon. It is understood that the riot was incited by agitators from Tokio, Inflammatory placerds were posted in the slums Tuesday and were torn down by the police. The mob used many short iron bars and had kerosene ready, showing that there was some organization. It had threatened to burn all the police boxes tonight but this threat has been fore-stalled by the precautions of the troops. The city is now quiet.

No anti-foreign sentiment exists and there is a growing feeling in business cir-cles that the rioting is senseless and mischlevous and must be strongly sup-

"No trace of an anti-foreign or anti-Christian sentiment, as entertained by the Boxers, exists even in the remotest corner of the empire. Had the recent rising been even tinged with such a feeling, why were the foreigners not ettacked at the Imperial hotel, next door to the minister's residence, which was the object of repeated attack dur-ing the rioting? There was no attempt at violence towards the guests of the hotel, who were permitted to quietly observe the disturbance in the street. A slight injury suffered by an American delivery next year up to date aggregate edizon occurred in a street crowded 1.500,000 tons. In addition to this with excited people and it was quite ac-

TOKIO, Sept. 13, (10 a. m.) -- Advices from Yakohama say that a riot occur-red there shortly after midnight Tuesday night. The mob was divided into ly coolies, boatmen and outcasts, Eight police boxes were demolished and

The mob directed its attack against three objects, the police stations, the residences of the customs officials and the large commercial houses.

Four hundred troops were sent from

Tokio on a special train a little before dawn and soldiers are now guarding the consulates, the warehouses containing

explosives and the oil tanks.

The governor of the prefecture and the mayor of Yokohama have issued at the Portsmouth conference, was proclamations instructing the people to dace confidence, in the ability of the authorities to restore order.

Six hundred Russian prisoners of war from Karatute, who were staying at the different hotels, have been placed under special guard. During the riot the po-lice armed with pistols while the molthree severely wounded and thirty-seven slightly injured. Ninety-eight of the med are under arrest.

The mob set fire to the police boxes by sorking buts in oil, firing them and throwing them at the objects of attack. Quiet has apparently been restored.

TOKIO, Sept. 3. (3 p. m.) - In a speech before the local governors today Premier

Katsura said: "The peace negotiations, brought about

through the good offices of President Receivelt, have been concluded. During the twenty months of hostilities the war was successfully carried out with a united national support. Your earnest and efficient efforts in guiding the people of your respective localities are fully recognized. Now that peace has been restored your further efforts are desirable in dealing with post-bellum measures so as to afford full play to the enterprising energy possessed by the nation in so remarkable a degree. CHICAGO. Sept. 13.—Executive officers of the Freight Handlers' union held a meeting today to consider replies by the general managers of railroads to wages. The strike feeling abated somewhat when the union leaders interpreted the written replies of a number of general managers to mean that they were willing to enter into negotiations

with the union.

Representatives of the union deter-

nined to seek conference with several f the larger roads. Before the hour set by the union executives for an auswer to their ultimatum replies had been received from thirteen of the twenty-four companies in the general managers' association. When the executive board of the union met and found that the managers refused to open negotiations with the la-bor organization, but offered to listen to committees of working freight men each road dealing with its own employes, the determination was made to postpone the proposed referendum vote on the question of striking. Committees of employes from each road will wait upon the local freight agents

# LIFE INSURANCE AND SYNDICATES

WITH SIDE LINES OF PERSONAL PROFITS FOR SOME.

to Committee How the Finances

Are Handled.

NEW YORK, Sept. 13 -A vigorous de ense of syndicates and their operations n connection with the insurance business and a frank statement of personal profits gained through their operations, made by Frederick Cromwell, treasurer, of the Mutual Life Insurance company, were the features of today's session of he special executive committee appointed to probe methods of life insurance companies in this state. The defense of the syndicates was made by Crom-well soon after he was called to the stand in the morning. Before he was asked a question he begged leave to say few words and upon being directed proceed, said:

Combinations Needed. The law of combination which affects finance, as everything else, has made syndicates necessary. When I became treasurer of the Mutual Life Insurance company the total assets of our company were \$100,000,000. The transactions in my department now are, over \$100,000,000 per annum. When our receipts were less—twenty years ago was quite possible for us to buy from ond dealers and pay the successive pro-its but now it is absolutely impossible to buy advantageously large blocks of securities, except as they are allowed by the combinations of capital popularly called syndicates and we have to go into hem to get our investments and get them in sufficient size-and at 'ground floor' prices. We could not make our investments without syndicates and we are partners in every syndicate into which we go.

"I want to say further that unless we went into these syndicates we would not be able to invest our funds except by buying in small quantities and paying the successive profits of middle men.

Enormous Assets.

I ask you, Mr. Hughes and the comnittee, to consider that we have now mittee, to consider that we have now over \$450,000,000 of assets and while we have over \$100,000,000 invested in bonds TO SAFEGUARD INTERESTS OF AN the necessity of finding additional investments for our large accumulations of funds. This is the condition. It is no theory. It is a condition which we meet and, the exhibits are here which show how we have to employ it.
"Our investments are such that when

Mr. Tapan, I suppose about the most widely nown and honored bank president in his day, died in New York, he left it as a condition that his trustees should have one privilege and that was of the Mutual Life Insurance company. That is the way we invested our money, but we could not make the transactions of \$100,000,000 a year in the securities bougut by this company without using

syndicates. Personal Profits.

acknowledgement of personal profits was made in a tabulated statement presented to the committee after It showed that Cromwell had made a personal profit of \$263,71 from syndicate operations during the past five years, in which he individually and the Mutual Life Insurance company had

cived serious attention and that the lack of information as to the exact participated.

Golden Opportunities. rough mountain range from the coast and the trail is not passable by any vehicles. Amapala, on the Gulf of Fonseca, on the southern boundary of

Among these transactions the connection of trust companies with the Mutual Life was brought out when it was stated that the one million pounds sterling subscription to a Japanese loan was shared by the United States Mortgage and Trust Company and the Guarantee Trust Company. In this relation, Cromwell said In explaining

"We gave these opportunities to the trust companies in which we keld interests foil very good reasons. As I explained this morning, we, as an insurance company, need very large banking facilities for very large interests. It goes without saying that it is better for us to use our own companies rather than give to institutions with which we have no connection the handling of our large investments. For this reason we China, and the remaining two direct to put men into the directorate of thesi Vladivostek with flour. The Russian subsidiary companies to look after the port is short of provisions owing to the interests of the Mutual. They are not late war and an effort will be made there for the profit of the interest on the to supply the deficiency before the port paltry 100 shares they have to hold, but subsidiary companies to look after the interests of the Mutual. They are not paltry 100 shares they have to hold, but to protect the Mutual. It is natural we should wish to put in as directors of these companies the same men as are on the board of the Mutual. I have 100 shares in these companies as a director but I have never made any secret of it.

Gargantuan Profits. Gargantuan Profits.

The result of our connection with these companies is that in fourteen years we have made through them a profit of \$100,000,000 for the policy holders. If we had not these institutions we should have to turn the Mutual Life Insurance company into a banking institution as well as a life insurance com-

pany. This we could not do.

This being the state of the case, it is natural we should help these subsidiary institutions to make money and should throw opportunities in their way, The men we put in them are not there for their own profit. They never get a dollar out of the Mutual unfairly and every cent they make through those trust companies and banks for the Mutual is for the policy holders and the policy holders alone."

No Joint Accounts.

Just before closing the inquiry for the day, Hughes said:
"We had some talk this morning, in

pany, of joint accounts. Have you any of these?" "No. sir, we have not and never had, replied Cromwell. We have no partners in our investments; that is, any investments we make are made by Mucnal Life and what is done for the Muitual is done for the policy holders."

Questioned further in this line, Crom-

well explained the syndicate transnetions. Non-Ledger Assets.

Have you any non-ledger assets? queried Hughes. We have two, one for \$11,000 and the other for \$900. We have a memorandum of them with the finance committee but

they are not counted assets. They are pears of the schooner Acapulco, formerly some shares that have no face value the Carmencita, and detained the vessel at present and we have been holding pending an investigation of the charge them for any result that may accrue." that sh Cromwell said the Mutual had never scaling.

be ore these questionable assets had any non-ledger securities within the past twenty-one years."

Frederick H. Shipman, assistant treasirer for the last three years of the New Fork Life Insurance company, was the first witness. He was examined on syndicate accounts. The Toronto Hamilton and Buffalo deals were the first taken up and the accounts were gone into in

"How could the New York Life" asked Hughes, "retire Toronto, Hamilton and New York Mutual's Treasurer Explained Buffalo bonds from the syndicite at

99 when it bought them while in the syndicate at 91?"
"Because the market price, in the opinion of C. M. Gibbs, the treasurer at the time, was then 99. We credited the profit, \$44,986, to profit and loss."

Shipman in reply to further ques-tions, said the company raised the price from 91 to 99, but that the profit had never been realized and the company holds the bonds at the present time. "The New York Life in this case," said Hughes, did not return bonds, as

is customary, to the syndicate members, but took them themselves and credited on the books a profit which in fact has not been made?"

Next Hughes turned to a joint account of Goldman Sachs & Co. and the ew York Life in 1899. How can you explain that on July

is, 1899, you buy and sell 750 bonds

on the same day according to your statement?" asked Hughes. "The only way I can explain it" Ship-man replied, "is that the New York Life held these bonds and wished to sell them. Therefore, it named a fair price and transferred them to a joint

necount.

Now don't you see the purchase is not for the syndicate, but for the New York Life Insurance Company?"
"I can't say; it is six years ago."

"Is it fair to say that the New Life enters into an agreement with others and provides the money for the purchase of the bonds and then gives the members of the syndicate the profit of

"Does it mean the New York Life pays one half profits to bankers to get them to handle the syndicate?" "Yes, I think it is sometimes advis-

able in order to get the business."

The Chicago, Builington & Quincy deal was next investigated. W. S. Fanshawe was the other member of this joint account. It too, was a purchase of bonds for re-sale amounting to \$500,000 to \$60,000.

"There seems a great many of these joint accounts," said Hughes: "Is it safe to say they are all speculative, like the Chicago & Northwestern!" He said another syndicate was formed to purchase the stock of the Chicago

Burlington & Quincy railroad. Shipman gave way to Edmund Ran-dolph, treasurer of the New York Life

Insurance company.

Randolph upon request gave details of the purchase for re-sale of certain

bonds for joint account.

Frederick Cromwell, treasurer of the Mutual Life Insurance Company, was also recalled. He made a statement to the effect that it is impossible for life insurance companies to seek investments nowadays without the aid of syndicates. He said that heretofore business could be conducted through a combination of big capitalists. The Mutual, he said; is doing a business of \$100,000,000 a year and must seek the medium of syndicates. This company he said has \$450,000,000 in vested of which sum \$150,000,000 is in bonds and mortgages.

OYSTER BAY, N. Y., Sept. 13.— President Roosevelt has denounced as fabrication and wholly without fourdation in truth, the report of an interview with him regarding the terms of peace between Russia and Japan publish coursed through the victim for thirty ed today in the Petit Parisien, of Paris and cabled to America and published here this morning. As soon as the pur-ported interview was called to his attention, the president directed Secretary Loeb to send to the correspondent of the Parisien, who was received at Sagamore

Hill, the following telegram:
Oyster Bay, N. Y., Sept. 13, 1905.—
Gaston Richard, Hotel La Fayette, New York. The president directs me to say to you that the alleged interview with him published in this morning's papers is not only an absolute fabrica-tion wholly without basis of truth but that your conduct in obtaining permission to see him under false pretense is thoroughly dishonorable.

When you came to see the president you informed him that you were the grandson of Marshal Augereau; that you ad been at the battle of Mukden with the Russian army and with the Japanese army afterwards; that you understood thoroughly that you could have no interview of any kind and that you simply wished to pay a respect to him.
"Under these circumstances the presi-

dent received you and listened to account of your experiences with the Japanese and Russians and spoke to you also of the deeds of Marshal Augereau and of Nappleon's other generals.

The president had no conversation with you about the terms of peace and your account of your alleged interview with him is a fabrication from begin ning to end; without any foundation in fact and both your untruthfulness and your obtaining permission to see him under false pretenses the president considers highly dishonorable.

RUSSIAN REFORMER TALKED OF CONDITIONS.

Although War Would Have Been Conducive of Reform Colonization

Should End.

LONDON, Sept. 13.—The correspondent of the Standard at St. Petersburg sends an interview which he had with Maxim Gorky, the Russian novelist, at he will shortly return to Moscow to be present at productions of his new dra-matic work. Gorky said:

"I have no doubt that the conclusion of peace has strengthened the hands of the government nor have I any doubt that the weakness of the government would have been our opportunity. Apart, however, from any effect that peace may have upon the attainment of political liberty our colonial venture ought to end. We have no mission to colonize for we have more land of our own than we can cultivate in this cen-tury and beside we have nothing to give to others."

Gorky then referred to the terrible onditions of Poland and the Caucus which had been left to degenerate in-stead of to develop and said:

'I fear our lesson has not been thor-ough and that we shall return to schemes for Asiatic expansion, instead of devoting our energies to domestic af

Without sparing the views of the lib-erals, who welcomed peace for various tactical reasons, one of them being that the returning soldiers would swell the demand for political reform, Maxim Gorky expressed the opinion that war at home, such as the government has instigated in the Caucasus and which is being waged on a smaller scale throughout the country. He said, however, that he did not despair of the cause of freedom and was confident that the peasants are matter in the country. ants, no matter in what manner they might be elected, would surprise the government by their insistence on liberty, and that once liberty was obtained, "there is bound to be a marvelous unfolding of the spiritual and intellectual faculties of the people."

GIRL'S MURDERER

WAS ELECTROCUTED IN RECORD TIME

AUBURN, N. Y., Sept. 12.—Record-breaking celerity was the only unusual feature of the electrocution of Henry Manzer today in the death chamber at Auburn prison. The witnesses entered the room at 6.05 o'clock. Manzer was escorted to the chair one minute later. In another minute he had been pinioned to the chair and the mask had been drawn over his face. State Executioner coursed through the victim for thirty seconds. This was was reduced gradual y and then the full strength was again turned on. Manzer was dead in precise-ly three minutes after walking to the chair. He had not emitted a murmur nor shown any indication of fear.

Manzer, at the little town of Scriba six miles east of Oswego, in May last waylaid Corn Sweet, 12 years old, and ravished and murdered her.

### THEORIES OF GOVERNMENT.

The following letter has been addressed to the Republican, in regard to ness to life." an editorial discussion of some of Mr. Pryar's theories of government:

"Editor Republican:-Will you kindly claborate your views in regard to the theory of government more fully? I confess that I held somewhat the belief formulated by the people themselves, and the other, or at least an other form was based on force and executed by j the few on the many. To say that eithof ages of evolutionary effort no more conflicts with the views of Mr. Bryan a- quoted than the statement God crewith the theory of organic evolution. I hope you will consider the subject of enough importance to treat further.

"Fresno, September 13, 1905." there are only two theories of govern- drama. ment, one is that government is a thing created by the people for themselves? and the other is "that governments are imposed by the few on the many-such governments rest on force." The one is a statement of the familiar fact that the made by the people and sometimes imposed on the people. The other is an allegation that government itself--the transition from an ungoverned to a governed state-originated either in the act traceable to this primitive legislative act, generations, or else that there are no 'just powers' at all, and government is to be regarded simply as a force strong enough to compel obedience. And this latter statement is not so much contrary to the truth as wholly aside from the point. For, whatever force or referendum may have had to do with changing the forms of governments, neither one had anything to do with the original establishment of government (there never was any such original establishment) and neither one is the basis of the right of government to require

the obedience of the citizen. During the eighteenth century, the so-called "social contract" theory was did not aspire to be a Circus Maximus. generally accepted, and it died out slowly under the influence of nincteenth contury thought and knowledge. Jefferson took the theory quite for granted, as the only one of which he had ever heard, and it is also found in Blackstone, where, like other legal fictions, it may have its use. According to it, man was originally in a "state of cature," in which rights." Such a state being intolerable, men organized government, and ceded to it such of their natural rights as they found it inconvenient to exercise individually. This cession is regarded as the basis of governmental au-

Of course there never was such a "state of nature," nor any such surrender of individual rights. Every man born now is born into an organized society, to which his allegiance was established before he was born. And the same is true of every generation born in the past, The first human children ever born had parents, and were subject to family govcriment. If ever men have lived in absolutely isolated families, family government was all there was, or could be. But wherever larger numbers have lived panded itself into the clan and tribe. transition is unbroken, and government. through all these stages, is a growth, not a fabricated device. The true state the imperative need of "one safe crossof nature is not the ungoverned, but ing," or two if possible, across the the governed state. Aristotle's ancient Southern Pacific tracks. dietum "Phusei politikon zoon anthropos" man is by nature a political an-imal" expresses also the most modern FRUIT BUYING view. Man is not by nature an inrelated individual possessed of all natural rights except those he has relinquished. He is by wature a member of organized society, deriving his rights and owing his duties to that society. Government is the external form of the social organization. Its rightful authority depends on the extent to which it embedies the a tual life of the organism. If this is what is meant by the "consent of the governed" or that "government is a thing created by the people for themselves, then both phrases are correct. But this is not what Jefferson meant or Bryan

Should be studied by every citizen of California. It should be taught to the children, both in the school-room and in the home, as a matter of first importance. One of the easiest ways to learn California Geography is to secure one of the Fresno Republican's New Home Wall Charts. It will give you an excellent topographic relief map of California with statistics on elevations and irrigations. It will also give you a political map of the state of California, showing every county, river, railroad, town and city in the state. It also gives the population of every county, city, town and village, according to the latest government census, and this is not all. It shows you a splendid map of the United States, the Panama canal and history and statistics, it also gives you a special topographic map of Eastern Asia, Japan and the Island of Sakhalin. Also gives you a special map of the Philippines, Hawaii, Porto Rico, and to add to the beauty and usefulness of these charts, we give you in beautiful colors the flags of all nations. These all make a most convenient and useful reference aid to the business man, lawyer, doctor, teacher, or any other intelligent citizen. Every office, library or home should have one of these excellent library wall charts. You can obtain one of these wall charts by subscribing or continuing the paper for six months and paying extra express charge of 20 cents. Citation Issued to Enticutor of John

Bray Estate

Judge Austin has issued a citation to
Thomas Bray, who was made executor
of the will of John Bray, ordering him to appear in the judge's courtroom on January 2nd, to show cause why his letters testamentary should not be revoked and letters issued to Public Administrator R. D. Chittenden. Chittenden and his attorney, M. F. McCormick, are acting for William Heron Bray and Charles Eagland Bray, legatees under the will of John Bray, who are withheld from their share of the estate on account of the dereliction of the executor. Judge Church has signed an order of final discharge of the public administra-

tor in the Dennis Daly estate. Suit for annulment of marriage was brought vesterday by Kate Owens against Bertram E. Owens. G. W. Cart-

right is Mrs. Owen's attorney. Suit for divorce was commenced vesterday by Suchie E. Buer against John W. M. Baer. E. E. Shephard is attorney for the wife.

Lovers of Old Mexico Prepare to Celebrate Anniversary of Its

Founding.

VISALIA, Sept. 13.-A meeting was held at the office of County School Su-perintendent C. J. Walker in the courthouse this morning by representatives of the boards of trustees in the various high school districts of the county to determine a uniform rate for tuition. Under the law pussed by the last state legislature it is permissible to charge tuition, the law becoming operative on the first of July. As all of the board of trustees were not in attendance no definite understanding was come to other than that tuition will be gener-

ally charged.

The Moxican residents are preparing for a big celebration to be held here next Saturday, the occasion being the ninety-fifth anniversary of the founda-tion of the Mexican republic. There will be a parade in the morning followed by a program and addresses at Armory hall and a ball in the evening. There will be a ball game Sunday between Engine team No. 3 of Fresno and the local nine. In a game preand the local nine. In a game pre-viously played the Fresno nine was an

easy winner by the score of 12 to 8. Work on the new Grammar school building in the Price tract in the south part of town will begin Friday. C. J. Lindgren of Fresno has the contract,

the price being \$16,600.

The association cannery shut down yesterday evening for the season. The new cannery will run ten days longer. Lawrence Arney, and Miss Verna cent, both of Exeter, were married this afternoon in the parlors of the Palace hotel, City Recorder T. W. Holder of

WORSE THAN THE DISEASE The effects of Mercury and Potash are worse than the effects of Contagious Blood Poison, for which these minerals are generally used. They cannot cure the disease, and in addition set up a poison of their own, producing dyspepsia, by drying up the gastric juices, salivation, sores, mercurial Theumatism, and often

necrosis of the bones. Bowling Green, Ky., Mitchell House. Bowling Green, My., Mitchell House. Gentlemen:—For over four years I suffered greatly from a severe case of Contagious Blood Poison. I went to Hot Springs, staying there four months at a big expense. I then consulted physicians, who prescribed Mercury. Nothing did me any good, in fact the treatment proved more harmful than beneficial. Thus I continued to suffer for four years. I mentioned my case to a friend, who told me that 8. s. 3. had certainly cured him. I at once commenced its use, and in six months could find no trace of the disease whatever. This was about two years ago, and there has been no signs of return.

D. M. SANDERS.

S. S. S., a remedy made from roots, herbs and barks, is the only known antidote for Contagious Blood Poison. It taoroughly and permanently eradicates the poison from the blood so that no sign is ever seen of the disease in future. S. S. S. builds up instead of tearing down the system, as do Mercury and Potash, and when it has cured the disease every part of the body has been toned up by its purifying and tonic effects.

S. S. S. also removes any effects of the mineral treatment from the blood. We offer a reward of

A disputely from Karlstad to the Afterposen says that a feeling of depres-sion prevails as to the outcome of the negotiations and that the attitude of the Swedish commissioners regarding fortifications has grown stronger. The dispatch says it is hoped, however, that a modus vivendi will be reached after the signing of a treaty of arbitration.

STOCKHOLM, Sweden, Sept. 13,-Po litical circles disavow any desire on the part of Sweden to oppose the arbitration treaty demanded by Norway, but they point out that only the preliminary negotiations in regard to the form and contents of such a treaty can be disenssed at present as the conclusion of treaty is impossible until Norway has accepted Sweden's conditions and the atter has recognized Norway as an independent sovereign state. # TAGGART DIVORCE UP TO THE COURT

DECISION EXPECTED IN WEEK OR TEN DAYS

Appeal on Behalf of the

WOOSTER, Ohio, Sept. 13.—The trial of the divorce suit brought by Captain Elmore F. Taggart against his wife, Grace Culver Taggart, which has been Non here since August 2, was brought to a close this evening, the final summing up of the attorneys being made today. The trial has been one of the most

sensational ever heard in the Ohio courts and has aroused widespread interest. A number of well known army officers have been called as witnesses. The scene of the alleged misconduct on the part of both Captain Taggart and his wife have covered a wide area, Captain and Mrs. Taggart having lived at different times at Fort Leavenworth, Columbus, Ohio, Havana, Cuba, and in the Philippines, where the husband was in the service of his country.

Judge Eason will render his decision

in a week of ten days.

Attorney Sterling completed his argument in behalf of Captain Taggart this morning. He made an eloquent plea inconnection with the disposal of the Taggart children and brought tears to the eyes of nearly every one in the court room; including Judge Fason, Both Captain and Mrs. Taggart were visibly

Sterling advocated that the children be given either to Captain Taggart or to his parents in Oroville, and that Mrs. Taggart be permitted to visit then vhenever she wished.

At the conclusion of Sterling's address, Captain J. B. Taylor began the final plea for Mrs. Taggart.

Captain Taylor deplored the wide-spread publicity of the case and stated that all papers of the other side had been given to the public, while none of Mrs. Taggart's papers had been scattered

"We resolved in the beginning" he said, "to try this case to the court and not to the newspapers." At this point Judge Eason interposed and said: "All we see here are just two parties. I am trying this case on the law and the evidence."

SHOULD HAVE FLAME WARDEN.

Appeal Made to Board for Levy of Two- The Jump in Price Due to the Failure A Number of Standard Volumes cent Tax Levy for Chamber of Commerce.

The Board of Supervisors is in receipt a communication from E. T. Allen, state forester, that may result in the provision of a fire warden for this county. Allen declares that the estabishment of a fire warden here, if only for the dry season, will result in vast d to the county. This warden is to be head fire fighter, director and or-

The communication has not yet been read to the board. It is now in the hands of Clerk A. D. Ewing and will probably come up either today or to-morrow. From the wording of the communication it would appear that the forester wishes to name the man to fill the position should the supervisors here see fit to make arrangements for establishing the position. Allen's commu-nication in part is as follows: "Board of Supervisors, Fresno, Cal. "Gentlemen:—I am sending you a copy

It is not necessary to emphasize to you the serious injury to the commu-nity which results annually from loss of property, timber resources and protection to the water supply caused by for-est fires or the urgency of preventive action. Experience has proved that the most effective remedy is the presence, at east, during the dry season, of a reliable and energetic fire warden with authority to enforce the laws, call out assistance to fight fires, direct such work for its best efficiency, and secure the necessary supplies. It is well known that usually no one considers a forest fire his busi-ness until it threatens him, and that most fires would nexer become serious, was there some one to take steps as soon as they start. The presence of such an officer also restrains the careless and malicious and encourages and assists the op-

There is no intent upon the part of this office to mae the forest laws burdensome. It is recognized that over zealous and drastic reform might have a bad effect and that due allowance must be made for established customs and con-ditions. It is believed, therefore, that the expense to the county, or to a group of two or three small counties, of the compensation of a fire warden would be not only a most advantageous investment, but also heartily supported by every local interest. I accordingly invite your views on this subject and if possible a definite proposal for the appointment of a fire warden. I shall be glad to discuss in detail any system for his service or compensation and if desired to visit you personally for this purpose

# THIS IS CIRCUS DAY

THE BIG SHOW ARRIVED THIS MORNING AT EARLY HOUR.

The Barnum & Bailey Circus the Great est in the World—Some of the Big Features,

This is circus day.
But who needs to be reminded of that fact! There is something in the very air of circus day that breathes of sawdust, and spangles, and red lemonide, and elephants, and laughing byenss and acrobats, and airy, fairy riders, and a thousand other things associated in freams and in reality with the white

ABSOLUTELY. To be sure, there are circus days and circus days. There is the circus day that brings the little, two-by-four ring show that an avalanche of gaudy pre-liminary billing had promised to be the "most colossal aggregation of wond-PERIES, STOVES, ETC. ers that the world has ever looked upon," and which is simply ridiculous because it is so different. There is, too, the circus day that brings the show that, on a modest scale, honestly lives up to its pretentions. But, after all, there is only one really big circus day, and that is when the Barnum & Bailey Greatest Show on Earth comes to town. And that is not surprising, in view of the J Street, magnitude of this great amusement in-stitution. To any one who really cares and it is now certain that Belles made a husiness or getting good coin for worthless paper.

It came out yesterday that on August 2nd he forged the name of C. J. Carlsen to a check, drawn on the Fresno National bank for \$11.40. This check

in the morning. If he did so, he saw some surprising things suggestive of magnitude. He saw, down in the rail-road yards, five long trains of double length cars filled with the paraphernalis. of the show; he saw wagon after wagon unloaded and started with their splendid half-Percheron teams toward the show grounds; he saw thirty elephants and twenty camels lope down the runaways of their big box cars, and he ramark-ed nearly fifty cages of other animals lined up for the procession to the lot. A said. "Have you one of those bogus acts; he will see three rings and two stages which hundreds of riders and have don't you want it?" This renty L have don's you want it?" This reply seemed to suit the stranger, who took up the check. Hunault said he didn't care anything about the case since he had got his money out of it.

The next man Belles got into was a ratus used by Mile. Mauricia De Tiers, ratus used by Mlle. Mauricia De Tiers, who loops the gap in an automobile, and of Volo, the Volitant, who leaps the chasm on a bieycle; he will find in the adjoining pavilion, which is in itself larger than the main tent of any other ircus, the most complete collection of wild animals in America, including four specimens of the almost extinct giraffe; and the only bi-horned rhinoceros in America; in the stables he will discover over five hundred horses and of almost priceless value. If these things do not satisfy him in regard to the surpass-ing magnitude of the show, he is past conviction, or worse still, a dyspeptic. Owing to the magnitude of this year' show, the street parade has been dis pensed with, and the incitements of circus day will really begin with a wonder

ful free show on the exhibition grounds between 10:30 and 11 o'clock. This per-formance, which is given by the Weitzmanns, the most remarkable high-sin gymnasts ever teen in America, will be repeated prior to the evening show. There is no charge for it whatever. The first performance will begin at 2 o'clock and the final at 8.
